

# TAYLOR BACON

taylor.bacon@colostate.edu | 505.231.8086 (Cell)  
*Fort Collins, CO*

---

## EDUCATION

---

PhD, Soil & Crop Sciences, Colorado State University Aug 2022 – Present  
*Fort Collins, CO*

- Coursework includes: Modeling Ecosystem Biogeochemistry, Foundations for Carbon/Greenhouse Gas Management, Forest and Range Soils, Tools for Food-Energy-Water Systems Analysis, Soils and Global Change, Carbon Finance

PhD Course, Swedish University of Agricultural Sciences Jun 2023  
*Uppsala, Sweden*

- Two-week intensive course “Exploring the dynamics of soil organic matter through process-based modeling”

B.S.E, Chemical & Biological Engineering, Princeton University Jun 2019  
*Princeton, NJ*

- Energy & Environmental Technology Track with a minor in Sustainable Energy
- Senior Thesis: Bio-jet Fuels via Fischer-Tropsch Synthesis: Process simulation and scale-up analysis for decarbonizing aviation in the United States.
- Coursework includes: Chemistry of the Environment, Global Environmental Issues, Energy for a Greenhouse-Constrained World, Fundamentals of Biofuels, Chemical Reaction Engineering, Intro to Environmental Engineering

---

## RESEARCH

---

Graduate Research Assistant, Colorado State University Aug 2022 - Present  
*Fort Collins, CO*

- Collaborated with a team of solar energy engineers, animal scientists, ranchers, ecosystem modelers, and ecologists on a seven-year project studying co-location of regenerative grazing and large-scale solar energy, funded by the U.S. Department of Energy Solar Energy Technologies Office.
- Designed a multi-year experiment and created detailed research plans for studying the impacts of solar photovoltaic modules on ecosystem function, as well as the impacts of regenerative grazing as a vegetation management strategy compared to conventional mowing management.
- Led annual field work for the project, including installation of nearly 100 microclimate sensors, collecting hundreds of soil samples from two utility-owned solar arrays, overseeing a team of undergraduate student technicians on the laboratory analysis of these samples, and coordinating the collection and processing of nearly 3,000 vegetation samples across the first three project growing seasons.
- Analyzed extensive sets of microclimate, soil, and vegetation data from the field using R.

Senior Thesis, Princeton University  
*Princeton, NJ*

Apr 2018 - May 2019

- Reviewed relevant literature to understand the scope of existing work in the field of bio-jet fuel production and inform technical process design.
- Designed and modeled a chemical process to convert forestry residue into bio-jet fuel using the chemical engineering modeling software Aspen Plus.
- Used modeling results to inform an economic and process scale-up analysis, as well as evaluate the environmental impact of the process.
- Connected with researchers at the National Renewable Energy Lab to discuss modeling and design and visited an existing bio-fuel production plant in Iowa to understand operational challenges and meet with facility engineers.

---

## PROFESSIONAL EXPERIENCE

---

Analyst, U.S. Climate & Clean Air, Environmental Defense Fund  
*Boulder, CO*

Aug 2021 – Aug 2022

- Collaborated with consultants and partner organizations on modeling to inform power sector regulatory and policy strategy.
- Developed strategy, led coalition outreach, collaborated with EDF health scientists, and designed and executed analytical reports for campaign to strengthen the National Ambient Air Quality Standards.

High Meadows Fellow, Environmental Defense Fund  
*Washington, DC & Boulder, CO*

Sep 2019 - Aug 2021

- Analyzed data from technical EPA rulemakings and authored blogs posted on the EDF website to support legal preservation of core air quality protections under federal law.
- Contributed to technical comments, drafted talking points, testified at public hearings, and met with the White House Office of Management and Budget to advocate for stronger National Ambient Air Quality Standards.
- Researched public health, economic, and climate impacts of state-level carbon pollution limits and drafted fact sheets, blogs, graphics, and technical comments to support state climate policy advocacy in Virginia, New Mexico, and Pennsylvania.
- Tracked power company climate commitments and served on the sustainability advisory group of a large utility to advocate for stronger climate action.
- Analyzed emissions data to determine areas of concern for environmental justice under state-level power sector carbon trading programs.

Streicker Fellow, World Bioenergy Association  
*Stockholm, Sweden*

May - Aug 2018

- Received funding through the Streicker Fellowship to partner with an international organization for a summer. Authored a comprehensive report on liquid biofuels to provide background information to a global audience of more than 10,000 policy makers, researchers, and companies, collaborating with over two dozen experts from academia and industry from across the biofuel sector to review and edit the report.

Climate Fellow, Climate Foundation  
Woods Hole, MA

May - Aug 2017

- Collaborated with three other Climate Fellows to design, prototype, and test a marine permaculture system for improving ecosystem health, sequestering carbon, and creating a sustainable food and material source.

Engineering Intern, Souder, Miller & Associates  
Santa Fe, NM

May - Aug 2016

- Supported Professional Engineers on a range of water system projects across Northern New Mexico by tracking material and cost estimates, contributing to and editing Preliminary Engineering Reports submitted to clients and the State of New Mexico, attending meetings with clients and managing communication, and following construction progress and meeting with contractors on site.

---

## TEACHING & MENTORSHIP

---

Guest Lecture, “Food & Energy” *SOCR 171: Environmental Issues in Agriculture*. Colorado State University. Fall 2025

Guest Lecture, “Agrivoltaics: Multi-use solar PV systems & solutions at the food/energy nexus” *ESS 501: Principles of Ecosystem Sustainability*. Colorado State University. Fall 2024

Guest Lecture, “Food & Energy” *SOCR 171: Environmental Issues in Agriculture*. Colorado State University. Fall 2024

Teaching Assistant, Colorado State University  
Fort Collins, CO

Fall 2024

- Served as a teaching assistant for *SOCR 171: Environmental Issues in Agriculture*.
- Responsible for teaching a recitation section of 20 undergraduate students, including lesson planning, facilitating classroom discussions, and grading weekly assignments.

Internship Supervisor, Colorado State University  
Fort Collins, CO

Nov 2023-May 2024

- Supervised and advised senior undergraduate student in literature review and research protocol proposal for completion of Ecosystem Science & Sustainability degree requirements.

Guest Lecture, “Agrivoltaics: Multi-use solar PV systems & solutions at the food/energy nexus” *ESS 501: Principles of Ecosystem Sustainability*. Colorado State University. Fall 2023

Undergraduate Teaching Assistant, Princeton University  
Princeton, NJ

Sep 2016 - May 2017

- Invited by faculty to work as an undergraduate teaching assistant for the Freshman Seminar Philosophical Analysis with Argument Maps after completing the course the previous fall.
- Assisted with lesson plans and course structure and led in-class exercises in addition to working with pairs of students during class.

- Evaluated student work and wrote up to 1,500 words of feedback for two to three students each week.
  - Held one-on-one meetings with students to discuss feedback on their work, answer questions, and address challenges or points of confusion.
- 

## GRANTS, SCHOLARSHIPS & FELLOWSHIPS

---

CSU School of Global Environmental Sustainability Diana Wall Sustainability Fellowship	2025-2026
Office of the Vice President for Research Graduate Fellow	2024-2025
Graduate Travel Stipend for participation in the 2023 National Science Foundation Research Traineeship (NRT) Annual Meeting in Tempe, Arizona	
InTERFEWS Fellow	2022-2025
• Funded trainee in the Interdisciplinary Training, Education and Research in Food-Energy-Water Systems (InTERFEWS) Program at Colorado State University	

---

## MEDIA & PUBLIC ENGAGEMENT

---

METER Group, Inc. “Ep. 27: The Battle for Earth: Cattle vs. Solar.” *We Measure the World* [Audio Podcast]. Aug 22, 2023. <https://www.metergroup.com/en/meter-environment/podcast/episode-27-battle-earth-cattle-vs-solar-0>

---

## HONORS & AWARDS

---

Michelle Goudie '93 Senior Thesis Award	Jun 2019
Andlinger Center Senior Thesis Prize in Energy and the Environment	Jun 2019
Sigma Xi, Scientific Research Honor Society	2019
Tau Beta Pi, Engineering Honor Society	2018

---

## PROFESSIONAL AFFILIATIONS

---

American Geophysical Union  
Ecological Society of America  
Society of Range Management

---

## TRAINING & PROFESSIONAL DEVELOPMENT

---

Employing Model-Based Reasoning in Socio-Environmental Synthesis (EMBeRS) Aug 2023  
*Fort Collins, CO*

- Week-long intensive training in interdisciplinary collaboration and stakeholder engagement.

Written Communication Workshop May 2023  
*Fort Collins, CO*

- Full-day workshop on effective written science communication

---

## VOLUNTEER & EXTRACURRICULAR EXPERIENCE

---

Community Engagement Board Member, Princeton U. Energy Association 2017 – 2019

Project Leader, Princeton University Eco-Reps 2016 - 2019

Climbing Wall Staff, Princeton University Outdoor Action 2017 – 2019

---

## PRESENTATIONS & POSTERS

---

### Oral Presentations

**Invited Presenter.** (2025, December). *Solar Carbon Patterning within Solar PV Systems: Comparison of a Three-Year and Fourteen-Year-Old Site in the Southeastern U.S.* Presented at the American Geophysical Union 2025 Annual Meeting, New Orleans, LA.

Presenter. (2025, August). *Ecosystem dynamics in a humid sub-tropical agrivoltaic grazing system: Two years of integrated research.* Presented at the Ecological Society of America Annual Meeting, Baltimore, MD.

Presenter. (2025, July). *Two years of integrated ecological research in an agrivoltaic grazing system: Impacts of microclimate & land-management on vegetation productivity & carbon cycling.* Presented at Agrivoltaic World Conference, Freiburg, Germany.

Co-Presenter. (2024, January). *Agrivoltaics on the Range: An Interdisciplinary Team Investigates How Solar Energy Generation and Ranching Go Hand in Hand.* Presented at Society of Range Management Annual Meeting, Sparks, NV.

Presenter. (2023, July). *Cattle Tracker: Integrated PV System Design and Management Platform for the Co-Optimization of Regenerative Cattle Grazing and PV Solar Generation.* Presented at Colorado State University Agrivoltaics Lunch & Learn, Denver, CO.

Presenter. (2023, August). *CattleTracker: Understanding the potential of a regenerative grazing & solar-PV dual-use system.* Presented at the InTERFEWS Annual Meeting, Fort Collins, CO.

## Poster Presentations

Presenter. (2024, December). *Results from One Year of Integrated Research: Ecosystem Dynamics in an Agrivoltaic Grazing System*. Presented at the American Geophysical Union Annual Meeting, Washington, DC.

Presenter. (2024, June). *Ecosystem Outcomes & Carbon Dynamics in Agrivoltaic Grazing Systems*. Presented at the World Agrivoltaics Conference, Denver, CO.

Presenter. (2023, November). *Understanding ecosystem benefits of regenerative grazing within a solar array*. Presented at the Colorado State University Graduate Student Showcase, Fort Collins, CO.

Presenter. (2023, September). *Understanding multi-use land management systems with regenerative grazing and solar PV*. Presented at the Colorado Agrivoltaics Symposium, Denver, CO.
